

my brain
has too many
tabs open.

Hi, I'm Elizabeth. My brain is constantly going in ten different directions. The amount of windows & tabs open on my computer is a pretty good indicator of what's happening in my head. Constantly catching up on one thing while planning another, always starting a bit more than I can probably handle, but what can I say? I like to stay busy.

Too many hobbies become passions, and I end up investing a lot of time into most things I do. Besides constantly looking for new things to do, which I probably do not have time for, I spend my outside-of-class time working for The Everygirl, sewing and making things, hosting vintage pop-ups in Chicago, walking my little senior pup, and traveling.
